Skills

- **Language**: C#, JAVA, NodeJS
- **Framework**: Spring Boot, .NET, Express
- **Database**: MongoDB, MySQL, Neo4j
- **DevOps:** Docker, GitOps, Linux, CI/CD
- **Tools**: Bruno, Git,Docker compose
- **AI Tools:** ClaudeCode, Cursor

Education

University: Ho Chi Minh City University of Technology — 2022 - 2026

Achievement: Semifinalist in the IT Got Talent 2025 competition.

GPA: 3.19 / 4.0
English: Studing TOEIC (Target 650)

Projects

Enterprise Knowledge Graph (EKG System) — Oct 2025 - Jan 2026

BACKEND/DEVOPS

Tech: ExpressJS, Neo4j, Redis, Docker, JWT

· Designed Neo4j database schema mapping 80+ employees, skills, and project relationships.
. Implemented Redis caching layer for chat history via Docker, reducing database load by 60%.
. Built Chain-of-Thought agent system to optimize user queries before LLM processing.
. Developed auto model routing service that selects optimal LLM (Ollama/Gemini) based on query complexity

ThinkAI E-Learning Platform — 2026 - Present

BACKEND/DEVOPS

Tech: Spring Boot 3, Aiven MySQL, Docker, CI/CD, Railway.
. Implemented JWT authentication with role-based access control (Admin/Teacher/Student).

. Deployed backend on Railway and database on Aiven MySQL with connection pooling optimization.
. Built CI/CD pipelines with GitHub Actions integrating DevSecOps practices (SAST scanning).
· Optimized database queries supporting 100+ concurrent mock-test sessions with 40% improved throughput.
. Developed RESTful APIs handling course lifecycle, subscriptions, and exam system..
